

V:KIT Products

Welcome to the V:Kit Store. Here you can be sure that the products are developed and designed specifically for analytical instrument qualification.

Qualification Kits

Sets of traceable, certified, standard solutions designed to provide a complete qualification for a specified system configuration.

Standard Solutions

The same standard solutions as found in our kits can be purchased individually as VSOLs. Each have a certificate of analysis.

Qualification Licences

Purchase VLIC licences for your V:Kit software. Available in sets or individually.

Qualification Tools

Proven tools for OQ testing including multi-channel thermometers, pressure meters and liquid and gas flowmeters.

Tool Calibration

With certificates traceable to international standards and optimised in the ranges used in laboratory instruments.

Spares and Accessories

Additional spares and widgets to assist your AIQ efforts, including paper rolls, columns.
